

# Integration & Consolidation

Solution by Wiesberg. Powered by IBM.

## What it is

Wiesberg Integration & Consolidation is all about providing you with a wholesome view of your company. It is a single comprehensive solution, which integrates, communicates and cooperates across your business. The solution performs consolidation, budgeting & planning, reporting & visualization all in one.

The solution is scalable so you can start small and add functionalities according to your needs as they grow. Integration & Consolidation is available as on-premise, cloud or mixed deployment environment.

## What you get

Digitized processes Automation Workflow management	One truth Data integrity Data insights	A single solution Integrated environment User-friendly interface
Minimizes errors & enables value creation	Facilitates trust in data & decision making	Makes it simple to adopt & easy to appreciate

## Solution Components

### Consolidation

The solution provides current and accurate consolidation and report generation. Work with Excel's familiar tools while enjoying the benefits of a unified database. IBM Cognos Controller is quick, and easy to update due to flexible structures and configuration.

### Budgeting & Planning

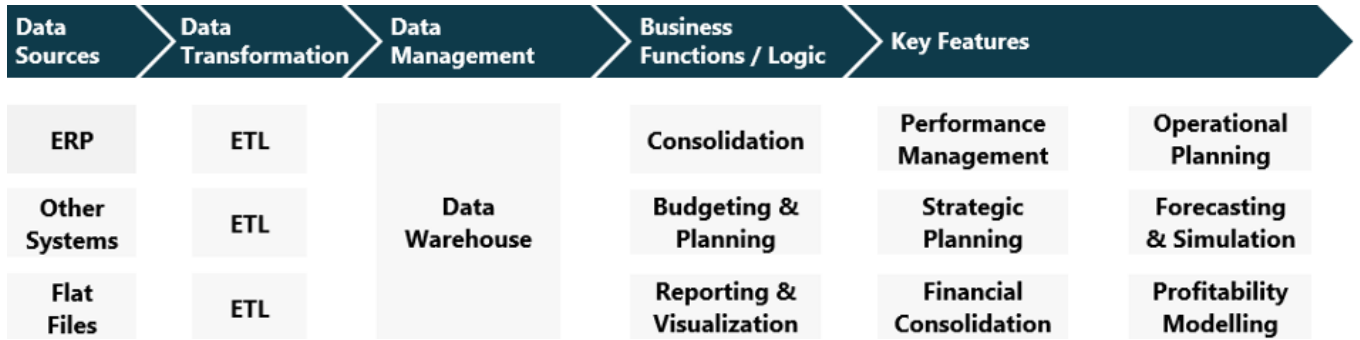

Integrates planned and realised data for a wholesome picture. Multidimensional models allow for tests, reliable forecasts and continuous planning. The solution runs on powerful in-memory cube technology based on IBM Planning Analytics powered by TM1.

### Reporting & Visualization

Reporting, visualization and sharing information is unified on one platform. Automation and built in intelligence make it easy to express data visually, also from multiple sources. Further IBM Cognos Analytics offers self-service analytics.

## Wiesberg Solution Information Model

### Implementation & Integration

We perform efficient and quick implementation and data integration to ensure minimized disruption period. This includes digitizing and automating otherwise manual processes and delivering preconfigured models, so that you hit the ground running. Select between 2 approaches:

#### Fast Track

The Fast Track implementation employs the plug&play method. The solution is complying with regulation standards and is integrated across all functions. We adapt the solution to match your internal reporting needs and satisfy your requests.

#### Customized Configuration

With Customized Configuration we build the solution around your requirements. Every setting is tailored to your needs. We implement in a prioritized fashion from "need to have" to "nice to have".

**Wiesberg holds a 100% successful implementation rate**

**We deliver on time and within budget**

### Informal Demo Meeting

Request our demo to see the solution unfold in action. For a personalized experience, please feel free to forward your corporate structure or other data. We will use the solution demonstration to address your unique situation and challenges.

### Why Choose Wiesberg

We have 15 years of experience with designing customized solutions based on best practice and industry specific knowledge. We have acquired expertise within simplifying and digitizing processes and structuring data, to ensure the most efficient set up.

 We **guarantee** delivering a solution that works.
